

CoGrammar Code Review

Review ID: 1308IM42JM

Student Name: JOHN MUSIU

Course: D1 Ruby

Output 4.2: Deploying your Code

Positive aspects of the submission

The submission is concise and provides evidence of the process followed to integrate, test and deploy your code. I find it useful that you included a link to your deployed application.

Aspects of the submission that could be improved

The submission could have been improved to describe how the tools were used for continuous integration and test automation. This description would make it easier to see how well you understood the concepts and applied them to your project code. You could also describe the project and reflect on who it is intended for, the scope of work, and how you have gotten feedback on it.

Overall feedback

The submission meets expectations because it shows how well you were able to set up your own CI/CD and improve the test automation, and release management.
